Selected Databases Available from the Biomedical Library's Web Site

Click on Key Resources to connect to these databases.

- **The Cochrane Library** – The Cochrane Library is a collection of six databases that contain high-quality, independent evidence to inform healthcare decision-making: *Cochrane Database of Systematic Reviews*, Central Register of Controlled Trials, Methodology Register, Database of Abstracts of Reviews of Effects, Health Technology Assessment Database, and the NHS Economic Evaluation Database, plus information on the 81 groups in the Cochrane Collaboration.
- **MedlinePlus** - The National Library of Medicine developed MedlinePlus for use by patients, their families, and friends. Provides access to consumer health information about over 900 specific diseases, conditions, and wellness issues in English, Spanish, and 48 other languages. Includes information on drugs and supplements, clinical trials and senior health, as well as medical dictionaries, a medical encyclopedia, videos, and more. MedlinePlus is reliable, up-to-date, and easy to understand.
- **PubMed@UCLA** - The National Library of Medicine's search service provides access to over 21 million citations in the health and life sciences. The database covers approximately 5,400 biomedical journals published in the United States and worldwide. Includes citations and abstracts to articles in medicine, nursing, dentistry, public health and the preclinical sciences (including genetics, immunology, molecular biology, microbiology, etc.). The **Filters** feature appears on the search results screen running down the left hand side and allows you to filter your results by date of publication, language, species, gender, etc. Coverage: 1948–present.
- **UpToDate** - Offers instant access to the most current clinical information and recommendations on patient care and treatment, written by expert faculty from the world's leading medical schools and academic medical centers. UpToDate covers more than 9,500 topics in 19 medical specialties and includes graded treatment recommendations, graphics, links to MEDLINE abstracts, patient handouts, medical calculators, and a drug database.
- **Web of Science** - Covers all disciplines and is particularly useful for interdisciplinary topics. Offers access to the *Arts and Humanities Citation Index*; *Science Citation Index*; *Social Sciences Citation Index*, *Conference Proceedings Citation Index*; *Index Chemicus*; *Current Chemical Reactions*. Content dates back as far as 1900 and covers 12,000 of the highest impact journals worldwide, as well as over 150,000 conference proceedings. The **General** search allows you to locate articles by subject term, author name, journal title, or author affiliation. **Cited Reference** search, a unique feature of ISI, lets you search for articles that cite an author or article that you specify. EndNote Web reference manager is fully integrated with Web of Science, and is available to all UCLA faculty, staff, and students at no extra cost.
