Selected Databases Available from the Biomedical Library’s Web Site

Use the Key Resources tab at the top of the Biomed Library web site to connect to these databases.

- **MedlinePlus** - The National Library of Medicine developed MedlinePlus for use by both the patient and the health care professional. It provides access to extensive information about specific diseases and conditions and both generic and brand-name drugs. The site includes links to consumer health information from the National Institutes of Health, a variety of medical dictionaries, a medical encyclopedia, several directories of hospitals and physicians, health information in Spanish and other languages, and information about clinical trials.

- **PsycINFO** - For psychology, psychiatry, and other mental-health-related topics such as education, business, medicine, nursing, pharmacology, law, linguistics, and social work. Contains citations to articles in over 1,800 professional journals, conference proceedings, books, reports, and dissertations in psychology and related disciplines. Most citations include abstracts. Coverage: 1806–present.

- **PubMed@UCLA** - The National Library of Medicine’s search service provides access to over 20 million citations in the health and life sciences. The database covers approximately 5,400 biomedical journals published in the United States and worldwide. Includes citations and abstracts to articles in medicine, nursing, dentistry, public health and the preclinical sciences (including genetics, immunology, molecular biology, microbiology, etc.). The Limits feature allows you to filter your results by date of publication, language, species, gender, etc. Coverage: 1948–present.

- **Web of Science** - Covers all disciplines and is particularly useful for interdisciplinary topics. Offers access to the three ISI citation databases: *Arts and Humanities Citation Index; Science Citation Index; and Social Sciences Citation Index*. The General search allows you to locate articles by subject term, author name, journal title, or author affiliation. The Cited Reference search lets you search for articles that cite an author or article that you specify. Cited reference searching is unique to ISI. *Science Citation Index* coverage: 1900–present, *Social Sciences Citation Index* coverage: 1956–present, *Arts and Humanities Citation Index* coverage: 1975–present.
