Selected Databases Available from the Biomedical Library’s Web Site

Use the tab to connect to these databases.

- **MD Consult** – A federated search across selected medical textbooks, journals, practice guidelines, drug information, patient handouts and CME materials. Special features include the ability to search for medical images and patient education handouts in Spanish.

- **PubMed@UCLA** - The National Library of Medicine’s search service provides access to over 20 million citations in the health and life sciences. The database covers approximately 5,400 biomedical journals published in the United States and worldwide. Includes citations and abstracts to articles in medicine, nursing, dentistry, public health and the preclinical sciences (including genetics, immunology, molecular biology, microbiology, etc.). The **Limits** feature allows you to filter your results by date of publication, language, species, gender, etc. Coverage: 1948–present.

- **DynaMed** - DynaMed is a 'point-of-care' clinical reference tool with clinically-organized summaries for nearly 3,000 topics. DynaMed is updated daily and monitors the content of over 500 medical journals and systematic evidence review databases. Each publication is thoroughly reviewed, and each article is evaluated for clinical relevance and scientific validity. The new evidence is then integrated with existing content, and overall conclusions are changed as appropriate representing a synthesis of the best available evidence. A PDA component is available for Palm OS, iPhone, Android Smartphone and Microsoft Mobile.

- **MedlinePlus** - The National Library of Medicine developed MedlinePlus for use by both the patient and the health care professional. It provides access to consumer health information about specific diseases and conditions in English, Spanish and 45 other languages. Includes information on drugs and supplements, clinical trials and senior health, as well as medical dictionaries, a medical encyclopedia, and videos.

- **CINAHL Plus with Full Text** - Expanded online version of the *Cumulative Index to Nursing and Allied Health Literature*. Offers complete coverage of English-language nursing journals and publications from the National League for Nursing and the American Nurses' Association. Includes over 4,175 professional nursing journals, health care books and chapters, nursing dissertations, conference proceedings, evidence-based care sheets, standards of practice, educational software, audiovisuals, legal cases, clinical paths, drug records, research instruments, and clinical trials. Covers nursing, biomedicine, alternative/complementary medicine, consumer health, and 17 allied health disciplines. Coverage: 1937–present.
